Implementation of Shopping cart through Cookies

Project Description:

Project Overview

This is an online cat shop called as catpalace. Here the customers can order cats.

The Purpose of the Project

The purpose of this project was to implement a shopping cart through cookies.

Technologies Used:

The languages used for development of this project are:

1. Php
2. MySql
3. html/css

The tools used are:

1. Sublime text
2. Xampp
3. phpmyadmin

Use Of Cookies:

cat[3]		^ X	
Name			
cat[3]			
Content			
product_image%2F1f1aeea9e1e8c1a8c1619b6283c09e3457882580_385387032309605_8695719696630022144_n.jpg__Pearls__245__Snowy__1+year+age%0D%0APearl+Like+eyes%0D%0AVery+Playful__3			

Whenever a user adds a certain cat to cart, the details of cat along with user Id are saved in a cookie rather than a database. It helps in saving a lot of junk in database. Once a user proceeds to checkout, then the data will be fetched from the cookie and then will be saved in the database.
